

CHANGES TO AATB STANDARDS FOR TISSUE BANKING
14th Edition

SECTION A
GENERAL INFORMATION

Current (14th Edition)

A2.000 Definition of Terms

SKIN PREP - The application of antiseptic solution to decontaminate the *skin*. This is a continuous process that is performed without delay between steps; it does not include shaving hair, although this can be done if preferred. The manufacturer's written recommendations *must* be followed, including that the antiseptic solution *should* remain in place for the recommended contact time and be allowed to air dry completely before the surgical drapes are placed.

With Amendments

A2.000 Definition of Terms

SKIN PREP - The application of antiseptic solution to decontaminate the *skin*. This is a continuous process that is performed without delay between steps; it does not include shaving hair, although this can be done if preferred. Unless otherwise qualified/validated, the manufacturer's written recommendations *must* be followed, including that the antiseptic solution *should* remain in place for the recommended contact time and be allowed to air dry completely before the surgical drapes are placed.

As Amended

A2.000 Definition of Terms

SKIN PREP - The application of antiseptic solution to decontaminate the *skin*. This is a continuous process that is performed without delay between steps; it does not include shaving hair, although this can be done if preferred. Unless otherwise *qualified/validated*, the manufacturer's written recommendations *must* be followed, including that the antiseptic solution *should* remain in place for the recommended contact time and be allowed to air dry completely before the surgical drapes are placed.
